EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

As to claim 2, lines 15-16, before "transfer", change "member" to - - body - - since there is no previous recitation of an intermediate transfer member, but rather an intermediate transfer body.

As to claim 3, line 12, before "transfer", change "member" to - - body - - since there is no previous recitation of an intermediate transfer member, but rather an intermediate transfer body.

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claim 1 is the inclusion of a cleaning means that contacts an intermediate transfer body; and control means for performing a control so that a subsequent image forming area on the intermediate transfer body does not overlap at a position where the cleaning member initially contacts the intermediate transfer body. This is found in all of claim 1, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 2 is the inclusion of a cleaning means that contacts an intermediate transfer body; a second transfer means performing a voltage-current detection operation on a transfer member of a second transfer means

Art Unit: 2852

when no image is formed and determining the transfer output of the transferring operation based on a detection result of the detecting operation; and control means for performing a control so that a detection area of the detection operation does not overlap at a position where the cleaning member initially contacts the intermediate transfer body or separates from the intermediate transfer body. This is found in all of claim 2, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 3 and 4 is the inclusion of a cleaning means that contacts an intermediate transfer body; and control means for performing a control so that in a subsequent contacting operation of a transfer member of a second transfer means and an image forming area do not overlap at a position where the cleaning member separates from intermediate transfer body. This is found in all of claims 3 and 4, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fukao et al. and Inamoto et al. disclose art about intermediate transfer members.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan S. Lee whose telephone number is 571-272-2137. The examiner can normally be reached on Mon. - Fri., 10:30-8:00, Second Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Art Grimley can be reached on 571-272-2136 or 571-272-2800 (Ext. 52). The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
